

Patented

Food-grade Platinum Silicone

THE MTG CLEARASIL ANTISTATIC LINE OFFERS SOLUTIONS FOR THE FOOD, COSMETIC AND PHARMACEUTICAL INDUSTRIES, PROVIDING ANTISTATIC, REGULATORY-COMPLIANT HOSES SUITABLE FOR USE IN ATEX ZONES

ATEX Zones

The MTG Clearsil Antistatic hose line is INERIS-certified for use in ATEX zones (**Explosive Atmospheres**), ensuring maximum operational safety with electrical wall resistance below $10^9 \Omega$. These advanced antistatic properties make them the ideal solution for applications in potentially explosive environments.

Food Certifications

Made with antistatic gray platinum silicone rubber ($R < 10^8 \Omega$), this food-grade material is odorless, tasteless with a smooth glossy finish, easily cleanable with any non-aggressive detergent, and certified according to all major food safety regulations including EC 1935/2004, Italian DM 21/03/1973, EU 10/2011, FDA and BfR recommendations. The PFA inner tube of the PFA-Antistatic also complies with USP Class VI.

Production in our Cleanroom

Manufactured in an ISO 14644-1 Class 8 Cleanroom with complete traceability, CLEARASIL ANTISTATIC hoses contain no animal derivatives, phthalates, adipates, nitrosamines, or REACH-restricted substances. These non-plasticized hoses are entirely free from hazardous additives and chemical components.
